AN ACT concerning interstate civil defense and ratifying on behalf of the state of Michigan a compact therefor.

The People of the State of Michigan enact:

30.261 Interstate civil defense and disaster compact.

Sec. 1. The legislature of this state hereby ratifies a compact on behalf of the state of Michigan with any other state legally joining therein in the form substantially as follows:

INTERSTATE CIVIL DEFENSE AND DISASTER COMPACT

The contracting states solemnly agree:

Mutual aid.

Article 1. The purpose of this compact is to provide mutual aid among the states in meeting an emergency or disaster from enemy attack, including sabotage and subversive acts and direct attacks by bombs, shell fire and atomic, radiological, chemical, bacteriological means, and other weapons. The prompt, full and effective utilization of the resources of the respective states, including such resources as may be available from the United States government or any other source, are essential to the safety, care and welfare of the people thereof in the event of enemy action, and any other resources, including personnel, equipment or supplies, shall be incorporated into a plan or plans of mutual aid to be developed among the civil defense agencies or similar bodies of the states that are parties hereto. The directors of civil defense of all party states shall constitute a committee to formulate plans and take all necessary steps for the implementation of this compact.

Civil defense plans and programs.

Article 2. It shall be the duty of each party state to formulate civil defense plans and programs for application within such state. There shall be frequent consultation between the representatives of the states and with the United States government and the free exchange of information and plans, including inventories of any materials and equipment available for civil defense. In carrying out such civil defense plans and programs, the party states shall so far as possible provide and follow uniform standards, practices and rules and regulations, including:

(a) Insignia, arm bands and any other distinctive articles to designate and distinguish the different civil defense services;

(b) Blackouts and practice blackouts, air raid drills, mobilization of civil defense forces and other tests and exercises;

(c) Warnings and signals for drills or attacks and the mechanical devices to be used in connection therewith;

(d) The effective screening or extinguishing of all lights and lighting devices and appliances;

(e) Shutting off water mains, gas mains, electric power connections and the suspension of all other utility services;

(f) All materials or equipment used or to be used for civil defense purposes in order to assure that such materials and equipment will be easily and freely interchangeable when used in or by any other party states;

(g) The conduct of civilians and the movement and cessation of movement of pedestrians and vehicular traffic prior, during and subsequent to drills or attacks;

(h) The safety of public meetings or gatherings; and

(i) Mobile support units.

Resources, availability.

Article 3. Any party state requested to render mutual aid shall take such action as is necessary to provide and make available the resources covered by this compact in accordance with the terms hereof: Provided, That it is understood that the state rendering aid may withhold resources to the extent necessary to provide reasonable protection for such state. Each party state shall extend to the civil defense forces of any other party state, while operating within its state limits under the terms and conditions of this compact, the same powers (except that of arrest unless specifically authorized by the receiving state), duties, rights, privileges and immunities as if they were performing their duties in the state in which normally employed or rendering services. Civil defense forces will continue under the command and control of their regular leaders, but the organizational units will come under the operational control of the civil defense authorities of the state receiving assistance.

Certain licensees, recognition.

Article 4. Whenever any person holds a license, certificate or other permit issued by any state evidencing the meeting of qualifications for professional, mechanical or other skills, such person may render aid involving such skill in any party state to meet an emergency or disaster, and such state shall give due recognition to such license, certificate or other permit as if issued in the state in which aid is rendered.

Aid in another state.

Article 5. No party state or its officers or employees rendering aid in another state pursuant to this compact shall be criminally liable on account of any act or omission in good faith on the part of such forces while so engaged, or on account of the maintenance or use of any equipment or supplies in connection therewith.

Supplementary agreements.

Article 6. Inasmuch as it is probable that the pattern and detail of the machinery for mutual aid among 2 or more states may differ from that appropriate among other states party hereto, this instrument contains elements of a broad base common to all states, and nothing herein contained shall preclude any state from entering into supplementary agreements with another state or states. Such supplementary agreements may comprehend, but shall not be limited to, provisions for evacuation and reception of injured and other persons, and the exchange of medical, fire, police, public utility, reconnaissance, welfare, transportation and communications personnel, equipment and supplies.

Compensation and death benefits.

Article 7. Each party state shall provide for the payment of compensation and death benefits to injured members of the civil defense forces of that state and the representatives of deceased members of such forces in case such members sustain injuries or are killed while rendering aid pursuant to this compact, in the same manner and on the same terms as if the injury or death were sustained within such state.

The People of the State of Michigan enact:

35.61 Uniformity of service dates; definitions.

Sec. 1. In order to provide for the uniformity of service dates for veterans, the following dates and terms shall be applicable to all acts of the state relative to veterans:

(a) The term "veteran" means a person, including women, who served in the active military forces, during a period of war or who received the armed forces expeditionary or other campaign service medal during an emergency condition and who was discharged or released therefrom under honorable conditions.

The term "veteran" also includes a person who died in active military forces.

(b) The term "Spanish-American war" (1) means the period beginning on April 21, 1898, and ending on July 4, 1902, (2) includes the Philippine insurrection and the Boxer rebellion, and (3) in the case of a veteran who served with the United States military forces engaged in hostilities in the Moro province, means the period beginning on April 21, 1898, and ending on July 15, 1903.

(c) The term "World War I" (1) means the period beginning on April 6, 1917, and ending on November 11, 1918, and (2) in the case of a veteran who served with the United States military forces in Russia, means the period beginning on April 6, 1917, and ending on April 1, 1920.

(d) The term "World War II" means the period beginning December 7, 1941 and ending December 31, 1946, both dates inclusive.

(e) The term "Korean conflict" means the period between June 27, 1950 to January 31, 1955.

(f) Civil war and confederate veterans who served between April 12, 1861 and May 26, 1865.

(g) Indian wars. Since the Indian wars were fought intermittently over a period of years, the determination as to whether a person shall be considered as having rendered military service during these wars will be carefully considered by the state veterans' trust fund. January 1, 1817 through December 31, 1898 is considered Indian war period.

(h) Mexican wars. Since there were several skirmishes involving the Mexican border, such as Mexican border troubles 1911-1916; Veracruz expedition April 21, 1914 to November 26, 1914; punitive expedition into Mexico, March 15, 1916 to February 5, 1917; therefore the persons rendering military service in any of these skirmishes shall be considered veterans of the Mexican wars between 1911 and February 5, 1917.

(i) Future dates. The period beginning on the date of any future declaration of war by the congress or the beginning of an emergency condition recognized by the issuance of a presidential proclamation or a presidential executive order and in which the armed forces expeditionary medal or other campaign service medals are awarded according to presidential executive order and ending on a date prescribed by presidential proclamation or concurrent resolution of the congress.

(j) Veterans of the Korean conflict and veterans having served after January 31, 1955, in an area of hazardous duty for which an armed forces expeditionary or Vietnam service medal was received or veterans having served in the Vietnam era which is defined to be that period beginning August 5, 1964, and ending on a date prescribed by the president or the congress.

retirement board finds to be dependent upon the said member for at least 50% of his support at any time prior to, but not after, the effective date of his retirement. In the event any member, who has an option 2 election in force, as provided in this subdivision, shall die prior to the effective date of his retirement, his joint beneficiary shall, so long as he continues to be so dependent, receive the same retirement allowance as the said joint beneficiary would have been entitled to receive under the said option 2 if the said member had been regularly retired pursuant to the provisions of section 15 of this chapter the day preceding the date of his death, notwithstanding that he may not have acquired entitlement to service retirement.

(c) Any member who continues as a Michigan public school employee on or after the date he acquires 15 years of service credit, or any person who becomes entitled to retire as provided for in section 15 or 17 of this chapter, and who does not have an election of option 2 as provided in subdivision (b) of this section in force, and (1) dies prior to the effective date of his retirement, and (2) leaves a widow, or in the case of a female member leaves a husband whom the retirement board finds to be totally and permanently disabled and to have been dependent upon the said female member for at least 50% of his financial support, the said widow or dependent husband, as the case may be, shall receive a retirement allowance computed in the same manner, in all respects, as if the said member had (1) retired effective the day preceding the date of his death, (2) elected option 2 provided for in subdivision (a) of this section, and (3) nominated the said widow or dependent husband as joint beneficiary. Upon the remarriage or death of the said joint beneficiary, his retirement allowance shall terminate: Provided, That if the aggregate amount of retirement allowance payments received by said beneficiary is less than the accumulated contributions credited to the said member's account in the annuity accumulation fund at the time of the said member's death, the difference between his said accumulated contributions and the said aggregate [sic] amount of retirement allowance payments received by him shall be paid to the said member's legal representative. The provisions of this section shall apply in the case of any person otherwise entitled to the benefits hereof who died after May 27, 1953.

In the event a member who satisfies the other requirements of this subdivision (c) dies before retirement and there is no surviving spouse, his surviving child or children under age 18 years, each shall receive, until attainment of age 18 years, an allowance of an equal share of the retirement allowance which would have been paid to the spouse if living at the time of the member's death: Provided, That in no case shall the allowance payable to any such child exceed $1,200.00 per annum.

Members' current service.

(a) The contributions by the state for members' current service shall be a per cent of their aggregate annual compensations which will produce an amount which if paid annually during their future service will be sufficient to provide the reserves, at the time of their retirements, for the portions of the pensions to be paid them based upon their future service; and

Members' accrued service.

(b) The contributions for members' accrued service shall be a per cent of their aggregate annual compensations which will produce an amount which if paid annually over a period of years to be determined by the retirement board, not to exceed 50 years, will amortize, at regular interest, the unfunded pension reserves for the accrued service portions of the pensions to which they may become entitled; and

Pensions being paid retirants and beneficiaries.

(c) The contributions by the state for pensions being paid retirants and beneficiaries shall be a per cent of the aggregate annual compensation of members which will produce an amount which if paid annually over a period of years to be determined by the retirement board, not to exceed 25 years, will amortize, at regular interest, the unfunded pension reserves for pensions being paid retirants and beneficiaries.

Pension accumulation fund; social security taxes; appropriations; certification of sums due retirement systems; credit to funds.

(d) The legislature shall annually, or periodically, as determined by the legislature, appropriate to the retirement system, established under this chapter, the per cents determined in paragraphs (a), (b) and (c) of this section and the amounts required for employer's social security taxes for the members of the retirement system. The appropriation shall be paid from the state school aid fund for all members of the retirement system who are employees of a board of education or a school board of any public school district and from the general fund of the state for all other public school employees as defined in subsection (f) of section 1 of this chapter. The appropriations when made shall be credited to the pension accumulation fund.

On or before July 31 of each year the retirement board shall certify to the superintendent of public instruction the aggregate compensations estimated to be paid public school employees under chapter 1 of this act for the current fiscal year having begun July 1 and ending the next following June 30.

On the basis of this estimate the superintendent of public instruction shall compute the sum due and payable to the chapter 1 retirement system at the rate of 11% of the aggregate compensations of school board employees as provided in this subsection, and shall certify this amount to the state treasurer.

The state treasurer shall make payment of the amount certified to him by the superintendent of public instruction in 12 equal monthly installments.

Not later than 90 days after termination of each fiscal year the retirement board shall certify to the superintendent of public instruction the actual aggregate compensations paid to public school employees under chapter 1 of this act during the preceding fiscal year. Upon receipt thereof he shall compute any adjustment required due to any difference between the estimated and the actual aggregate compensations and cause any adjustment to be either added to or subtracted from amounts due the chapter 1 retirement system.

The superintendent of public instruction may require such evidence of correctness and/or may conduct such audit of the aggregate compensation as he considers necessary to establish their correctness.

Said commission may require in connection with such application such certificate of citizens, physicians or others, having knowledge of the applicant as the good of the service may require. The said commission may refuse to examine an applicant, or after examination, to certify as eligible, one who is found to lack any of the established preliminary requirements for the examination of position or employment for which he applied; or who is physically so disabled as to be rendered unfit for the performance of the duties of the position to which he seeks appointment; or who is addicted to the habitual use of intoxicating liquors or drugs; or who may have been guilty of any crime, or infamous or notoriously disgraceful conduct; or who has been dismissed from the public service for delinquency or misconduct; or who has made a false statement of any material fact, or practiced or attempted to practice any deception or fraud in his application, in his examination, or in securing his eligibility; or who refuses to comply with the rules and regulations of the commission. If at the close of this probationary term, the conduct or capacity of the probationer has not been satisfactory to the appointing officer, the probationer shall be notified, in writing, that he will not receive permanent appointment, whereupon his employment shall cease; otherwise his retention in the service shall be equivalent to his final appointment: Provided, however, That the probationer shall be entitled to a hearing before the commission as provided in section 14.

(b) Every position, unless filled by reinstatement, shall be filled only in the following manner: The appointing officer shall notify the civil service commission of any vacancy in the service which he desires to fill, and shall request the certification of eligibles. The commission shall forthwith certify, from the eligible list, the name of the person who received the highest average at preceding examinations held under the provisions of this act within a period of 2 years next preceding the date of such appointment. The appointing officer shall, thereupon, with sole reference to the relative merit and fitness of the candidate, make the appointment so certified. As each subsequent vacancy occurs, precisely the same procedure shall be followed. When an appointment is made under the provisions of this section, it shall be, in the first instance for the probationary period of 6 months, as provided in this act. The term "appointing officer" as used in this act shall be construed to mean the mayor or principal administrative or executive officer in any city, village or municipality.

(c) Whenever there are urgent reasons for filling a vacancy in any position in the fire or police department and there is no list of persons eligible for appointment the appointing officer may nominate a person to the civil service commission for a non-competitive examination; and if such nominee shall be certified by the said commission as qualified, after such non-competitive examination, he may be appointed temporarily, to fill such vacancy until a selection and appointment can be made after a competitive examination, and in the manner prescribed in this act; but such temporary appointment shall not continue for a longer period than 3 months, nor shall successive temporary appointments be made to the same position, under this provision. In the event of an emergency due to a war in which our country is involved, the civil service commission may make temporary appointments to fill vacancies, when appointments cannot be made under the provisions of this act, such appointments to be temporary, and only during hostilities, and 6 months thereafter.

All examinations shall be open to all applicants who have fulfilled the preliminary requirements, stated in other sections of this act. Notice of the time and place and purpose of every examination shall be given by the commission by publication for 2 weeks preceding such examination in the official paper of the city, village or municipality and such notice shall be posted by the commission in a conspicuous place in the office and on the bulletin boards of the city, village or municipality, for 2 weeks before such examination. In every case of charges having been made a copy of the statement of reasons therefor and answer thereto, if the person sought to be removed desires to file such written answer, shall be furnished to the civil service commission and entered upon its records. Such answer shall be filed by the member within 5 days after service of the charges upon him. If the person sought to be removed or reduced shall demand it, the civil service commission shall grant him a public hearing, which hearing shall be held within a period of 10 days from the filing of the charges in writing and a written answer thereto. Pending the period between the making of the charges as a basis for removal and the decision thereon by the commission the member shall remain in office. In the event that the removing officer fails to make charges to the satisfaction of a member or members of a fire or police department in a city, village or municipality, such member or members of a fire or police department may present the information to the civil service commission. In event that the civil service commission fails to justify the action of the removing officer then the person sought to be removed shall be reinstated with full pay for the entire period during which he may have been prevented from performing his usual employment, and no charges shall be officially recorded against his record. A written record of all testimony taken at such hearing shall be kept and preserved by the civil service commission, which record shall be sealed and not be available for public inspection, in event that no appeal shall be taken from the action of the commission. In event that the civil service commission shall sustain the action of the removing officer the person removed shall have an immediate right of appeal to the circuit court of the county wherein the city, village or municipality is situated. Said appeal shall be taken within 90 days from the entry from the civil service commission of its final order; upon such an appeal being taken and docketed with the clerk of the circuit court of said county, the circuit court shall proceed to hear the appeal upon the original record taken therein and no additional proof shall be permitted to be introduced. The circuit court's decision shall be final, saving the employee, however, the right to petition the supreme court for a review of the court's decision. The removing officer and the person sought to be removed shall at all times, both before the civil service commission and upon appeal, be given the right to employ counsel to represent either of them before said civil service commission and upon appeal; should the person removed elect to appeal to the circuit court as hereinbefore provided.

If for any reasons of economy it shall be deemed necessary by any city, village or municipality to reduce the number of paid members of any fire or police department, then said municipality shall follow the following procedure:

A city, village or municipality under the provisions of this act, may, upon the approval of the legislative body or the electors thereof increase the percentage of the payment from 2% up to a maximum of 2.5%. A member shall be given service credit for the time he is absent from active service without full pay on account of sickness or injury. In event his absence from active service is due to nonservice connected sickness or injury, no more than 60 days of such absence shall be credited as service in any one calendar year, as determined by the board.

The employers' accumulation fund shall be the fund in which shall be accumulated reserves for the payment of all pensions payable as provided in this act, except pensions to be paid from the casualty reserve fund. The payment of all pensions as provided in this act shall be paid from the employers' accumulation fund except such pensions as are payable from the retirement reserve fund and the casualty reserve fund. The board shall provide for the maintenance of separate accounts for each participating municipality in the employers' accumulation fund.

Actuarial valuation of pension reserve liabilities.

(a) Within a reasonable period of time prior to the date any municipality becomes a participating municipality, the said municipality shall furnish the executive secretary with data regarding each person in its employ which the actuary determines to be necessary to make an actuarial valuation of the pension reserve liabilities arising on account of service rendered and to be rendered the said municipality. Upon receipt of such data, the actuary shall, based upon such tables of experience and regular interest, as the board shall from time to time adopt, compute the liabilities for pensions payable and which might be payable as provided in this act, on account of service rendered and to be rendered by the said municipality's employees. The actuary shall report to the board and the said municipality indicating the cost to the municipality of paying its initial accrued service pension obligation in a single sum, or by amortization payments over a period of years not to exceed 40 years.

Initial accrued service pension obligation; agreement for payment.

(b) Based upon the actuary's report, as provided in subsection (a) of this section, the board and the governing body of the said municipality shall enter into an agreement which, in addition to other provisions, shall provide for the payment of the initial accrued service pension obligation of the said municipality.

Pension reserve liabilities; computation, amortization of accrued liabilities; payment of contribution by municipality.

(c) Based upon such tables of experience and regular interest as the board shall from time to time adopt, the actuary shall annually compute the pension reserve liabilities for pensions being paid from the employers' accumulation fund account of each participating municipality and the accrued pension reserve liabilities for each participating municipality's members who have not retired. The said accrued pension reserve liabilities, less the sum of the balance standing to the said participating municipality's credit in the employers' accumulation fund and the present value of the remaining payments to be made by the said participating municipality for its initial accrued service obligation, shall be amortized over a period of years to be determined by the board, but in no case more than 40 years from and after the said participating municipality's last valuation date. The board shall annually certify to the governing body of each participating municipality the contribution so determined, as provided herein, and each such participating municipality shall, during its ensuing fiscal year, pay such contribution into the funds of the retirement system. Upon receipt of such payments the board shall credit the employers' accumulation fund account of the participating municipality making such payment.

(b) Any member who continues in the employ of a participating municipality after the date he either (1) acquires 25 or more years of credited service, or (2) attains age 60 years and acquires 10 or more years of credited service, at any time prior to the date his retirement becomes effective, may elect option II provided in subsection (a) of this section and nominate a beneficiary whom the board finds to be dependent upon the member for at least 50% of his support due to lack of financial means. Prior to the date his retirement becomes effective, a member may revoke his election of option II and nomination of beneficiary and he may again, prior to the date his retirement becomes effective, elect the option II and nominate a beneficiary as provided in this subsection. Upon the death of a member who has an option II election and nomination of beneficiary in force, his beneficiary, if living and found by the board to be dependent upon the member for at least 50% of his support due to lack of financial means, shall immediately receive a retirement allowance computed according to the benefit program or programs applicable to the member, exclusive of section 47f, in the same manner in all respects as if the member had retired the first day of the calendar month preceding the date of his death, notwithstanding that he might not have satisfied the applicable age and service requirements for retirement. No retirement allowance shall be paid under this subsection if any benefits are paid or will become payable under any other provision of this act on account of the member's death.

(c) If a member who either (1) has 15 or more years of credited service, or (2) is age 60 years or older and has 10 or more years of credited service, and does not have an option II election and nomination of beneficiary in force as provided in subsection (a) or (b), (1) dies while in the employ of a participating municipality, or (2) dies subsequent to the date he files his written application for retirement but prior to the date his retirement becomes effective, and either (1) leaves a spouse, or (2) does not leave a spouse or his spouse subsequently dies and there survives an unmarried child or children of the deceased member who is under the age of 21 years, the spouse shall receive, or the children shall receive an equal share of, a retirement allowance equal to a percent of a retirement allowance computed according to the benefit program or programs applicable to the member, exclusive of section 47f, in the same manner in all respects as if the member had retired the first day of the calendar month preceding the date of his death, notwithstanding that he might not have satisfied the applicable age and service requirements for retirement. In the case of a spouse, the percent shall be 75% reduced by 1% for each full year in excess of 5 years by which the age of the deceased member on the date of his death exceeded the age of his spouse on that date. In no case shall the percent be less than 50%. The percent in the case of a child or children shall be 50%. In no case shall the retirement allowance paid be less than 15% of the deceased member's final average compensation. The retirement allowance payable a spouse shall terminate upon the death of the spouse. The share of a retirement allowance payable a child shall terminate upon the child's attainment of age 21 years, his marriage or his death, whichever occurs first, and the retirement allowance shall be redistributed among the remaining eligible children. If upon termination of all retirement allowance payments under this subsection the aggregate amount of retirement allowance payments made is less than the accumulated contributions credited to the deceased member's account in the employees' savings fund at the time of his death, the difference between his accumulated contributions and the aggregate amount of retirement allowance payments made shall be paid in accordance with subsection (a) of section 57. No retirement allowance shall be paid under this subsection to a spouse or child who is being paid or will be paid a retirement allowance or other benefit under another provision of this act on account of the member's death.

The 10-year total credited service requirement shall be waived if the board finds that the member's total and permanent incapacity is the natural and proximate result of a personal injury or disease arising out of and in the course of his actual performance of duty in the employ of the participating municipality.

(b) Subject to sections 55, 56 and 60, a member who is retired on account of disability as provided in subsection (a) shall receive a retirement allowance in accordance with section 47c. If the member's total credited service is less than 10 years the amount of his retirement allowance shall be computed as if he had 10 years of total credited service. The retirement allowance shall not be subject to section 47f and shall begin as of the first day of the calendar month following the more recent of (i) the date of the member's disability, the date which is 6 months prior to the date application for his disability retirement was filed with the board, and (ii) the date his name last appeared on a payroll of a participating municipality. If a disability retirant refuses to submit to such medical examination, his retirement allowance may be suspended by the board until his withdrawal of such refusal. In the event such member transfers his employment to another participating municipality within 90 days after his said separation from service, his accumulated contributions standing to his credit in the employees' savings fund shall remain in the said fund to the credit of the said member, unless he requests a refund of his said accumulated contributions. No refund shall be made to a member who has attained the age of 70 years in less than 30 days from the first day of the calendar month next succeeding that in which the member shall have attained the age of 70 years. Except in the case of becoming a beneficiary, all prior service and membership service which may have been credited to the judge shall be forfeited by him at the time his membership terminates. In the event he again becomes a judge before having attained age 60 years, he may again become a member, subject to the provisions of section 11; and in the event he again becomes a member within a period of 9 years following the date his membership last terminated, all prior service and membership service credit which was forfeited by him at the time of his last termination shall be restored to his credit, provided he pays into the annuity savings fund the amount of accumulated contributions which may have been previously refunded to him, together with regular interest thereon computed from the date of withdrawal to the date of repayment.

Any judge or former judge, who before the effective date of this 1968 amendment, met the service requirements in section 13 entitling him to a retirement annuity and failed to retire at the end of the judicial term in which he attained age 70 thereby forfeiting all of his prior service and membership service credit and all other rights under this act, shall have such credit and rights restored to his credit and shall receive a retirement annuity in the amount that would be payable to him had he retired at the time he should have retired to avoid a forfeiture under this section, such annuity to be effective and payable prospectively from the effective date of this 1968 amendment. The board may make appropriate transfers between funds to accomplish this result.

(a) Upon the basis of such mortality tables, regular interest, and other tables, as the board shall adopt, not less than once in each 5-year period the board shall engage an actuary to compute the amount of contributions which if paid annually during the entire prospective service of new members will be sufficient to provide for the annuity reserves fund required, at the time of their discontinuances from service, to cover the annuities to which they might be entitled. The amount of such single contribution shall be amortized over a period of years, to be determined by the board, not to exceed 40 years.

(c) The executive secretary shall deposit with the treasurer of the state of Michigan, in accordance with the accounting laws of the state, the amounts of money received by him under sections 31 and 32, or under any other section of this act. Sec. 20. The participants retirement fund is created. It shall be the fund in which shall be accumulated reserves for the payment of retirement allowances to retired participants; and from which retirement allowances shall be paid to retired participants, as provided in this act. Upon the basis of such mortality and other experience tables, and the prescribed rate of interest, as the board shall from time to time adopt, the actuary shall annually compute the retirement reserves (1) for retirement allowances being paid retirants and (2) covering service rendered and to be rendered by participants. It is the intention of this act that the retirement reserves shall be financed by other revenues to the fund and annual appropriations determined according to subsections (a), (b) and (c) of this section.

(a) The state's appropriation for current service shall be an amount which, if paid annually during the future service of participants, will be sufficient to provide the reserves at the time of their retirement, after allowing for the net contributions to the participants savings fund to be made by the participants, for the future service portions of the retirement allowances to which the participants might become entitled.

(b) The state's appropriation for participants' accrued service shall be an amount which if paid annually over a period of years determined by the board, but not to exceed 50 years, will amortize at the prescribed rate of interest the unfunded reserves for the accrued service portions of the retirement allowances to which the participants might become entitled.

(c) The state's appropriation for retirement allowances being paid from the participants retirement fund shall be an amount which if paid annually over a period of years determined by the board, but not to exceed 50 years, will amortize at the prescribed rate of interest the unfunded reserves for the retirement allowances.

The contributions shall be made by payroll deductions and each participant is deemed to consent and agree to the deductions as a condition of his participation in the system. Remarriage on death; orphans.

If there is no survivor but there are eligible children, or if eligible children survive a survivor, then the retirement allowance otherwise payable to a survivor shall be paid in equal parts to such eligible children until they become ineligible and the total of the retirement allowance paid the other child or children shall not be diminished because of the attainment of ineligible age, marriage or death of any such child.
